Sir:

The following comments are submitted in response to the Examiner's Reasons For Allowance dated September 2, 2008 in connection with the above-identified application.

In the paragraph numbered as "6" of the Examiner's Reasons for Allowance, the Examiner states as follows:

Pasquier differs from the present invention in that the present invention comprises a cycloolefin (A) which is not ring-opened polymerized and a metathesis polymerization catalyst. (D). The present invention further comprises a polymer composition which has been polymerized already and the term "*polymerization* composition" denotes a composition that has not been polymerization even though a metathesis catalyst is part of the composition. (Emphasis added).

Applicants believe that the Examiner misspoke in the last sentence. It appears that the Examiner meant to state as follows:

...the term "*polymerizable* composition" denotes a composition that has not been [polymerized]... even though a metathesis catalyst is part of the composition. (Emphasis added).

Furthermore, Applicants emphasize that it is the claims which define the patentable subject matter, not the comments of the Examiner.

Should there be any outstanding matters that need to be resolved in the present application, the Examiner is respectfully requested to contact Garth M. Dahlen, Ph.D., Esq., Reg. No. 43,575 at the telephone number of the undersigned below, to conduct an interview in an effort to expedite prosecution in connection with the present application.

If necessary, the Commissioner is hereby authorized in this, concurrent, and future replies to charge payment or credit any overpayment to Deposit Account No. 02-2448 for any additional fees required under 37.C.F.R. §§1.16 or 1.14; particularly, extension of time fees.

Dated: October 31, 2008

Respectfully submitted,

By
